

The World's Herbaria 2025: Report on Activity for April – June 2025

Issue 8.2, published July 2025

Barbara M. Thiers
Editor, *Index Herbariorum*

Summary paragraph: Updates to the *Index Herbariorum* database during this period included the addition of 31 new herbaria and 183 new staff members. Collectively the world's herbaria reported the addition of 168,806 specimens during this period. However, one very large herbarium revised its specimen total downward significantly (by three million specimens), so the change in total reported specimens declined this quarter by 2,621,941. Three herbaria were reported as permanently closed, and 45 staff were reported as no longer associated with herbaria. One herbarium that had previously been listed as inactive was reactivated. As of 31 June 2025, there are 3983 herbaria with 13,674 staff in the registry, reporting a total of 403,871,563 specimens.
